Qunci Villa’s Premium Coffee Selection

With our Coffee selection for our customers Qunci Villas continues their way of high quality standard with only healthy and best selection ingredients at top freshness. Working together with one of only a handful certified Q-Graders in Indonesia, our Hotel makes sure to serve you only the best beans for your breakfast coffee and our a la carte coffee Menu.

Commitment in sourcing and using local products:

Living in a country with beautiful nature gifts we believe that using the country's own resources is not only key to freshness but is also a necessity to help develop its own production and build up the confidence against a lot of imported products. Because of this we are proud to use **100% Indonesian coffee beans**, carefully selected and processed by chosen farmers and roasted in Indonesia with high quality equipment and quality checked by very passionate people in the industry. With this way of sourcing the coffee we know the exact roast date of every single bean used and are able to use the beans at a top freshness ..

Our Premium Blend

For our Breakfast Coffee and a la carte Menu coffees we are using a Premium Blend consisting **of 80% Arabica Beans from Aceh and 20% Robusta Beans from Java**. Both beans are roasted separately and then carefully blended and packed to order before delivered to us.

Flavor and taste profile

The beans are processed using the full washed method, dried to 12% moisture content and then roasted medium dark to make sure the origin flavors are still detectable. Our blend's character can be described as **well balanced with a medium acidity, medium to full body, high aroma with hints of chocolate flavors**, very well as black coffee and perfect match with milk in espresso based drinks like cappuccino. The roast profile and the quality of the beans it self make it very well acceptable for your digestive system, even on an empty stomach.

COFFEE IS ALWAYS A GOOD IDEA.....
